Executive Summary

VOID is a next-generation AI workforce platform designed to replace traditional human support and sales teams with autonomous, high-fidelity AI operatives. Our platform enables businesses to deploy AI agents that handle customer support, sales, and business workflows 24/7.

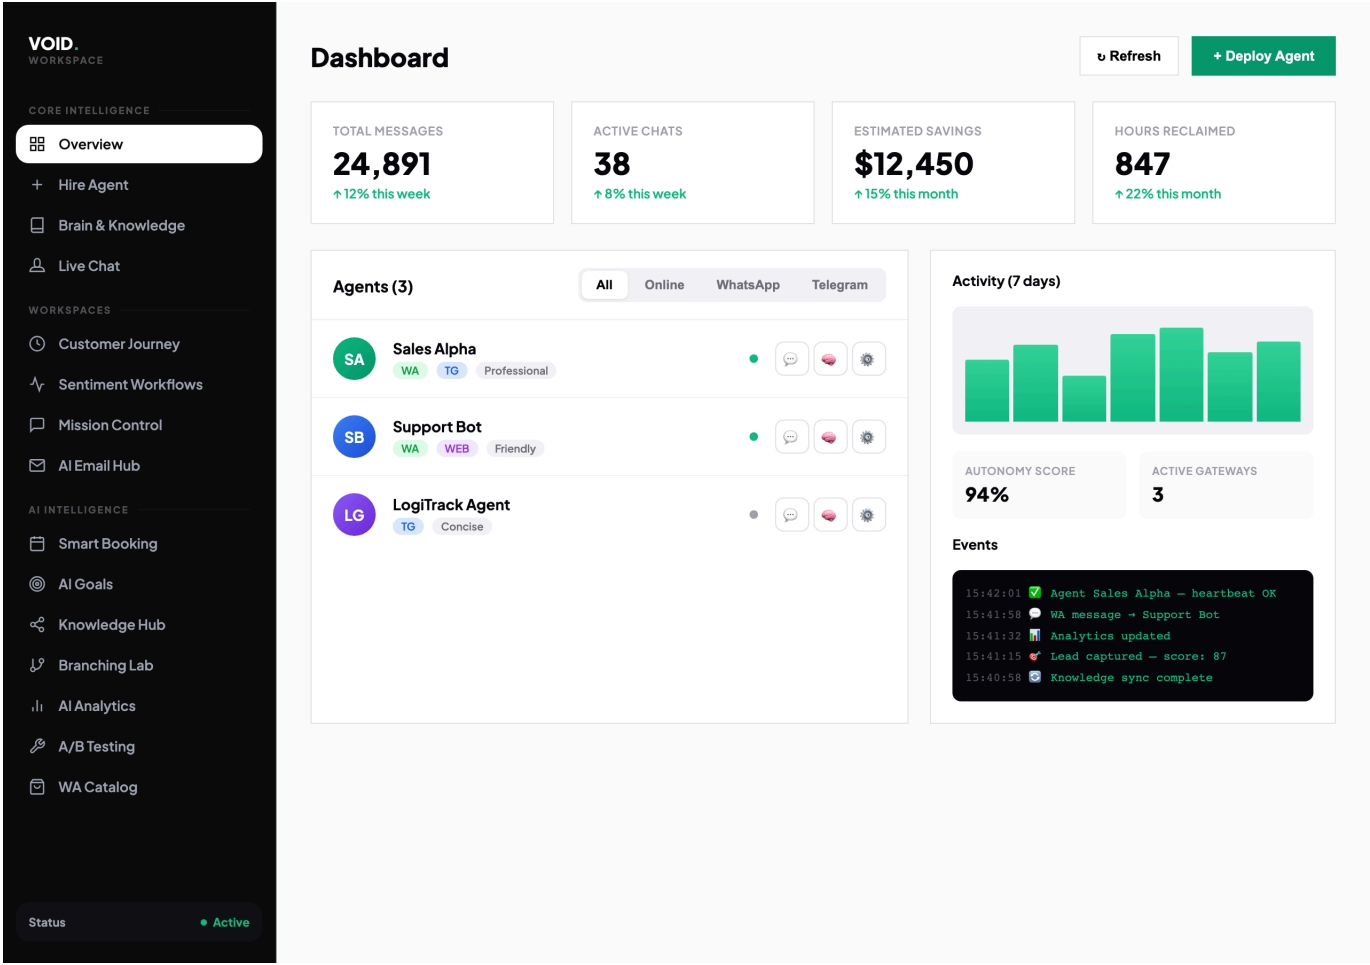

Mission: Provide businesses with a "Synthetic Workforce" that operates with zero latency, 24/7/365, at 1/100th the cost of a human department.

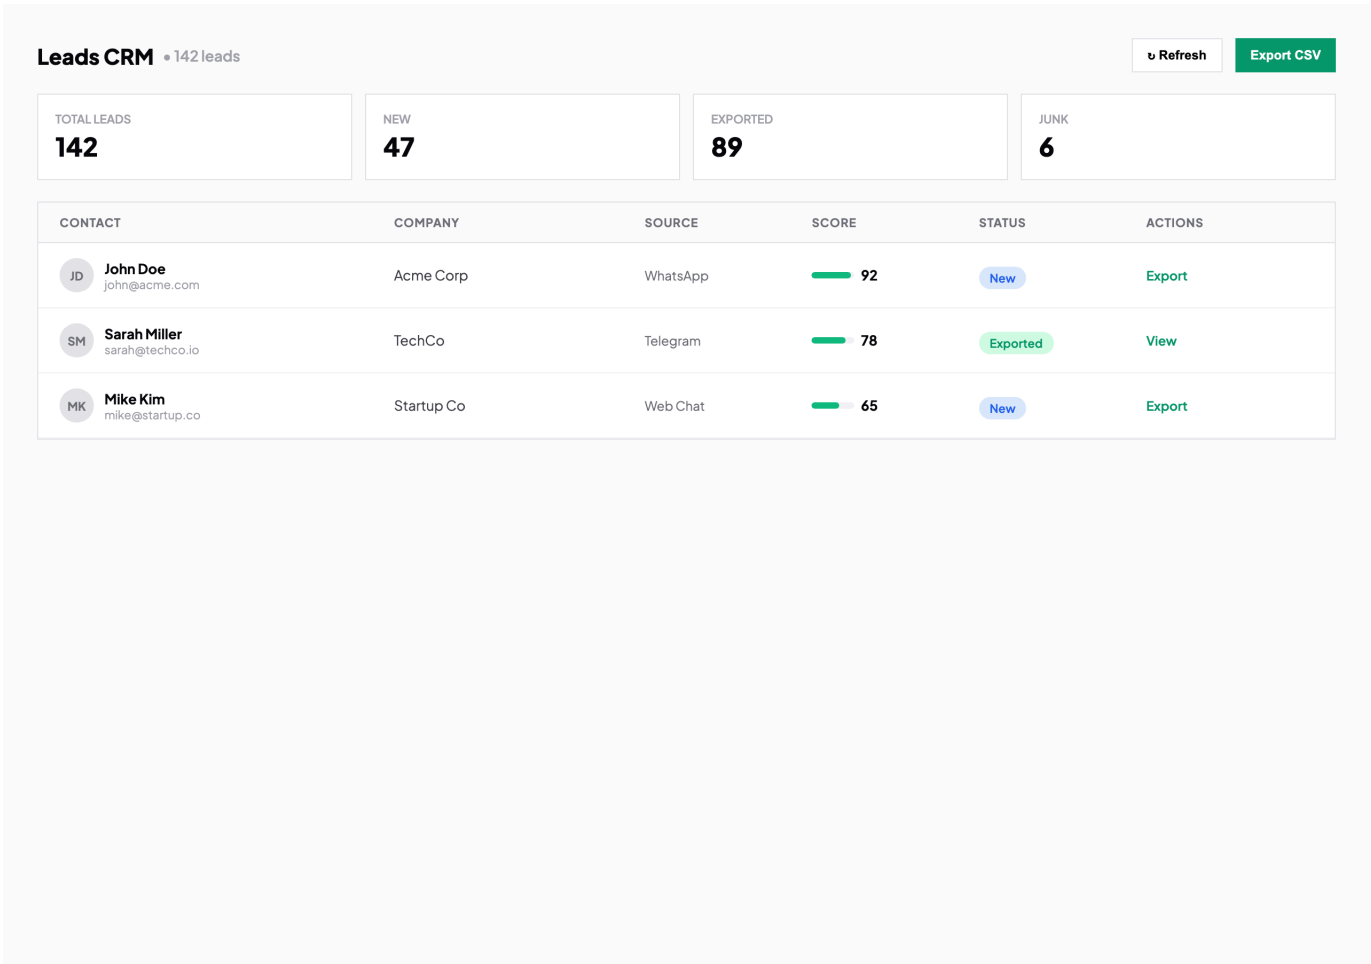

Core Features

🤖 AI Agent Deployment

- **Autonomous Agents:** Deploy AI agents that work independently without human intervention
- **Multi-Channel Support:** WhatsApp, Telegram, Web Chat, and Email integration
- **Real-Time Human Takeover:** Proprietary protocol allowing human admins to take control of AI conversations instantly
- **Neural Synthesis:** Personality-injection algorithm that calibrates tone of voice to match your brand identity

📊 Fleet Management Dashboard

- **Lead Capture:** Automatically capture leads from WhatsApp, Telegram, Web, and Email conversations
- **Lead Scoring:** AI-powered scoring to prioritize high-intent leads (0-100 score)
- **CRM Sync:** Export leads to CSV or sync via webhooks to Salesforce, HubSpot, or custom CRMs
- **Status Management:** Track leads as New, Exported, or Junk with bulk actions
- **Dynamic Segmentation:** AI-powered automatic lead segmentation based on behavior and engagement patterns
- **Bulk Lead Status Update:** Update multiple lead statuses simultaneously for efficient pipeline management
- **Saved Search Filters:** Save and reuse custom search filters for quick lead access
- **Lead Activity Timeline:** Visual timeline tracking all interactions and status changes per lead

Re: Enterprise Partnership Proposal

David Chen

<david@acme.com> • Acme Corp

Today at 10:32 AM

Hi,

I've reviewed the enterprise partnership proposal and I'm excited about the possibilities. I have a few questions about the pricing structure and the volume discounts you mentioned.

Could we schedule a call this week to discuss the details? I'd also like to understand the SLA terms better.

Best regards,
David

AI Summary

Intent:

Interested in enterprise partnership, wants to discuss pricing and SLAs.

Sentiment:

Positive — excited about possibilities.

Action:

Schedule a call to discuss details.

Reply

Forward

Schedule

- **Unified Inbox:** Manage all email communications from a single interface
- **AI-Powered Triage:** Automatic email categorization and priority scoring
- **Smart Compose:** AI-assisted email drafting with context from conversations
- **Multi-Account Support:** Connect multiple email accounts with IMAP/SMTP or Gmail OAuth

- **Live Monitoring:** Watch AI conversations in real-time across all channels
- **Human Takeover:** Instantly take control of any conversation when needed
- **Channel Visibility:** See which channel (WhatsApp, Telegram, Web, Email) each conversation is on
- **AI Status Tracking:** Monitor whether AI or human is handling each conversation
- **Conversation PDF Export:** Export any conversation to PDF for documentation and record-keeping

Knowledge Base Training

- **Document Ingestion:** Upload PDFs, DOCX, CSV, TXT files, or paste text snippets
- **Web Scraping:** Automatically crawl and ingest web pages to build knowledge
- **RAG Technology:** Retrieval-Augmented Generation ensures accurate, context-aware responses
- **Sovereign Training:** Each company's knowledge core is isolated - data never mixes

Integrations & Webhooks

- **CRM Integration:** Connect with your existing customer relationship management tools
- **Helpdesk Integration:** Seamless integration with popular helpdesk platforms
- **Custom Webhooks:** Build custom integrations for your specific workflow needs
- **API Access:** Full API access for enterprise-level integrations

Mike Kim	Consultation	Thu 3pm	WhatsApp	Confirmed

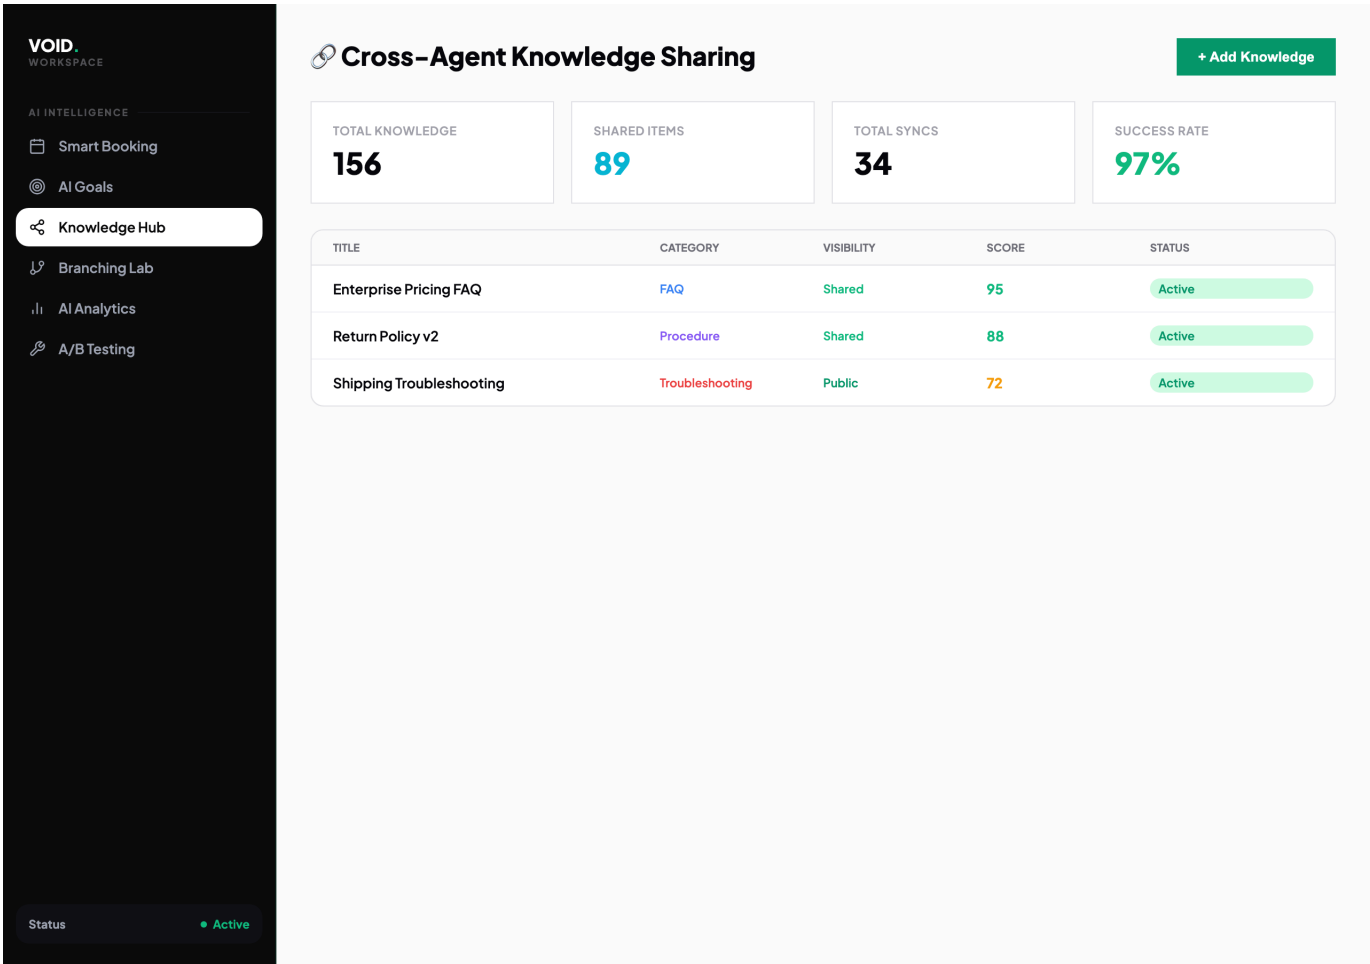

- **Cal.com Integration:** AI automatically detects scheduling intent in conversations and books meetings
- **Intent Detection:** AI recognizes when a customer wants to book a demo, consultation, or meeting
- **Availability Checking:** Real-time calendar availability with time zone support
- **Automated Scheduling:** Seamless booking flow from conversation to confirmed meeting

 Autonomous Goal Setting

- **AI Self-Optimization:** Agents set and track performance goals autonomously
- **Performance Targets:** Configurable goals for response time, satisfaction, conversion rate
- **Progress Tracking:** Real-time goal progress visualization with AI-driven adjustments
- **Optimization Engine:** AI suggests improvements based on goal performance data

 Cross-Agent Knowledge Sharing

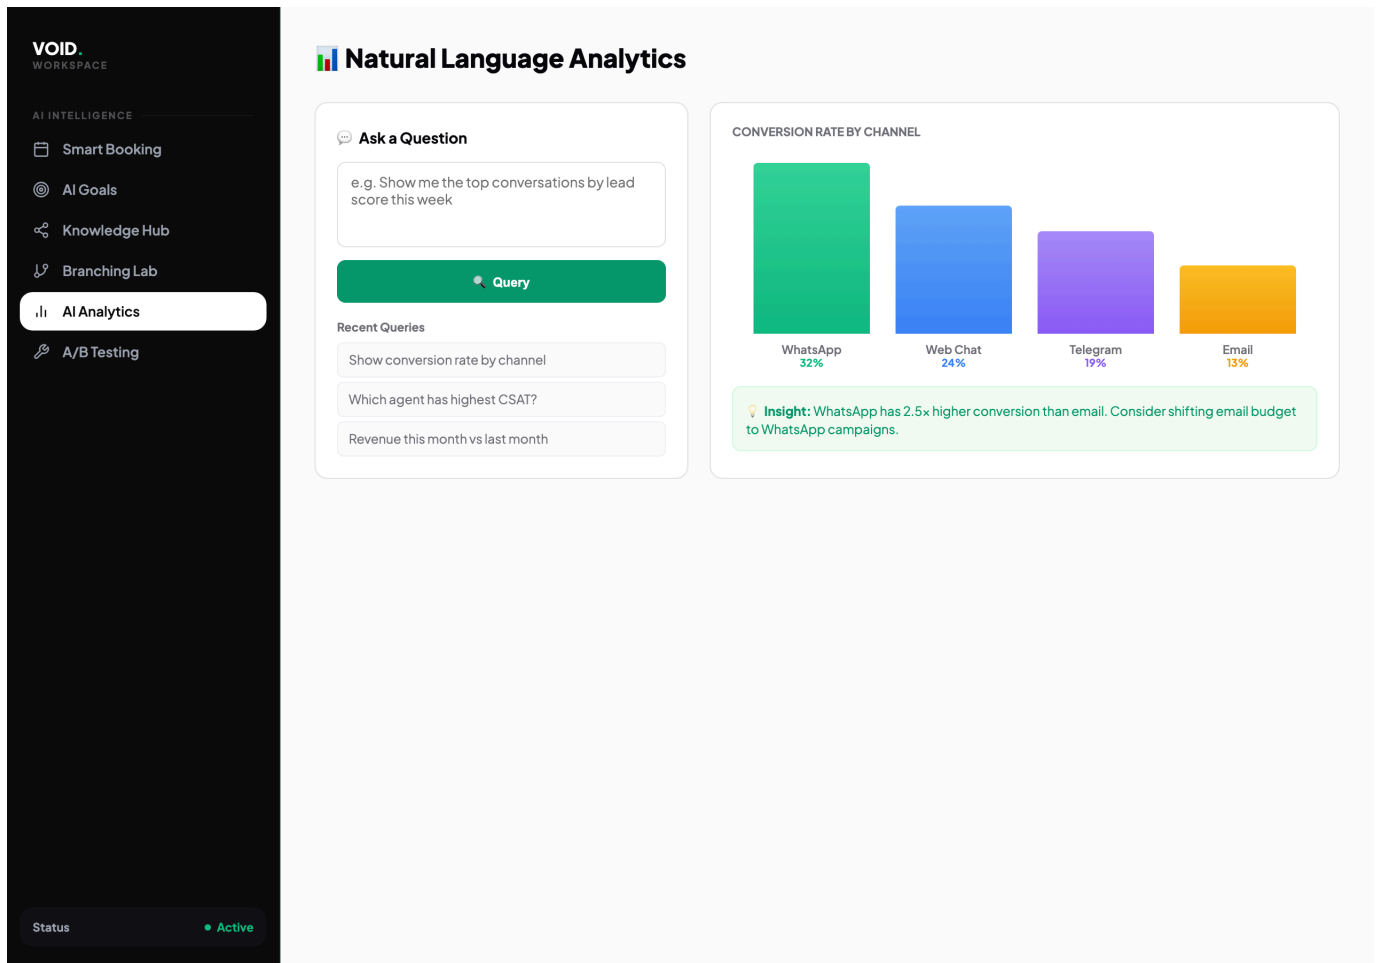

- **Shared Knowledge Graph:** Agents share learned knowledge across the organization
- **Version Control:** Track knowledge evolution with full version history
- **Conflict Resolution:** Intelligent merging when agents learn contradictory information
- **Search & Discovery:** Query the shared knowledge graph across all agents

 Conversation Branching Lab

- **What-If Analysis:** Test alternative agent responses in simulated scenarios
- **Performance Comparison:** Compare different conversation strategies side-by-side
- **Optimization Insights:** AI-recommended improvements based on branching analysis
- **Risk-Free Experimentation:** Test changes without affecting live conversations

 Natural Language Analytics

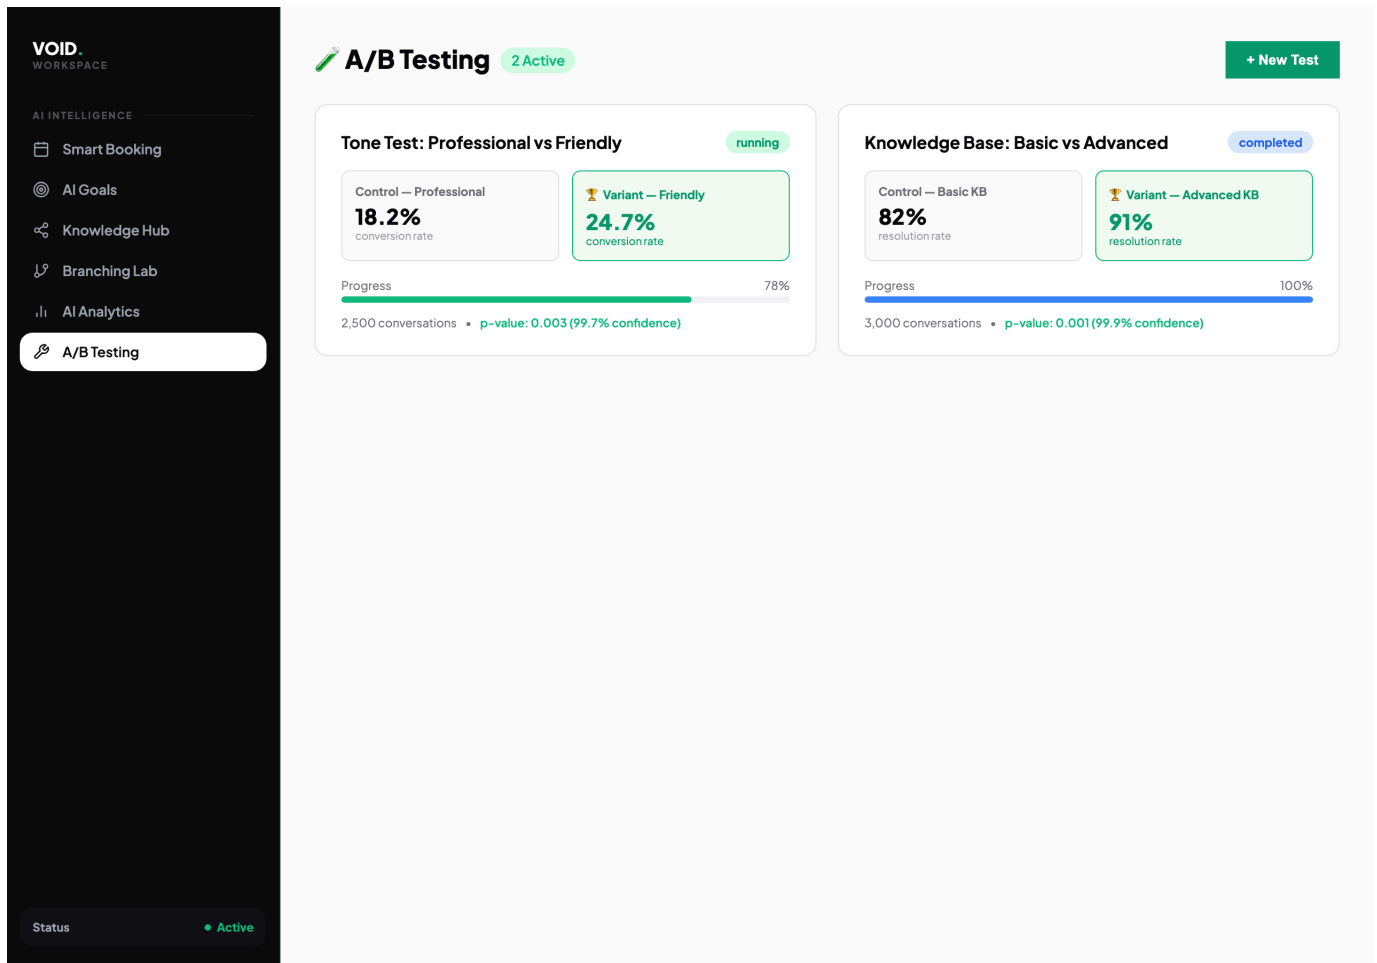

- **Plain English Queries:** Ask questions about your data in natural language
- **Instant Charts:** AI generates visualizations from natural language descriptions
- **Automated Insights:** AI identifies trends, anomalies, and opportunities in your data
- **Multi-Dimensional Analysis:** Explore data across agents, channels, time periods, and metrics

Multi-Language Auto-Detection (New)

- **Automatic Language Detection:** AI detects customer language and responds in the same language
- **Fast Heuristics:** Character patterns and word matching detect 90%+ of languages with zero token cost
- **LLM Fallback:** Uses AI only for ambiguous text with minimal token usage
- **30+ Languages:** Supports English, Spanish, French, German, Portuguese, Chinese, Japanese, Korean, Arabic, Hindi, and 20+ more
- **Translation Endpoint:** Human agents can translate conversations in real-time during takeover
- **Multi-Channel:** Works across web chat, WhatsApp, and Telegram

Agent A/B Testing (New)

- **Traffic Splitting:** Deterministic hashing ensures same customer always sees same variant
- **Variant Overrides:** Customize personality, tone, language, and knowledge base per variant
- **Statistical Significance:** Built-in Z-test for proportions with 95% confidence level
- **Real-Time Metrics:** Track conversations, conversions, satisfaction, and response times per variant
- **Winner Detection:** AI recommends winning variant based on primary metric
- **Full Dashboard:** Create, monitor, and analyze A/B tests from `/dashboard/ab-tests`

Conversation Context Windowing (New)

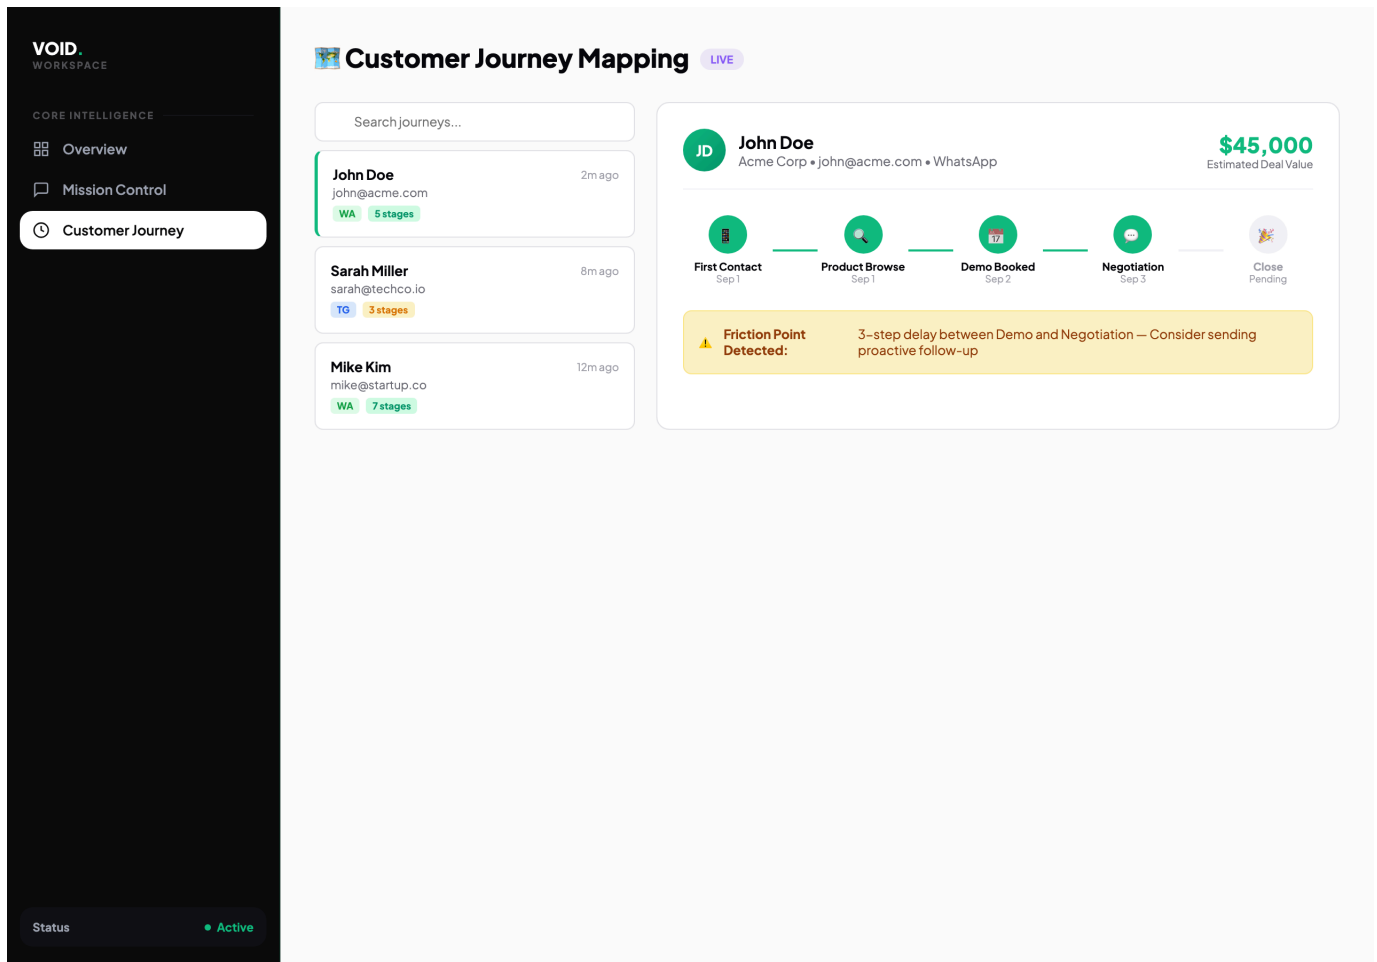

- **Smart Memory:** Automatically summarizes older messages to stay within token limits
- **Importance Scoring:** AI scores messages by importance (actions, leads, decisions, questions)
- **Sliding Window:** Keeps recent messages intact while summarizing older context
- **Token Optimization:** Reduces token usage by 40-60% without losing critical context
- **Configurable Per Agent:** Each agent can have custom windowing settings
- **LLM Summarization:** High-quality summaries that preserve names, decisions, and action items

WhatsApp Business Catalog Integration (New)

- **Product Catalog Sync:** Sync your WhatsApp Business product catalog directly into VOID
- **AI-Powered Recommendations:** Agents can browse and recommend products during conversations
- **Product Search:** Relevance-scored search across title, description, and category
- **Plan Gating:** Available for Pro and Enterprise subscription plans
- **Real-Time Updates:** Catalog data stays in sync with WhatsApp Business

Advanced CRM Features (New)

Customer Journey Mapping

- **Visual Timeline:** Track every customer touchpoint from first contact to conversion
- **Friction Point Detection:** Identify where customers stall or drop off
- **Channel Attribution:** See which channels drive the most value at each stage
- **Funnel Optimization:** Use real conversation data to reduce drop-off rates

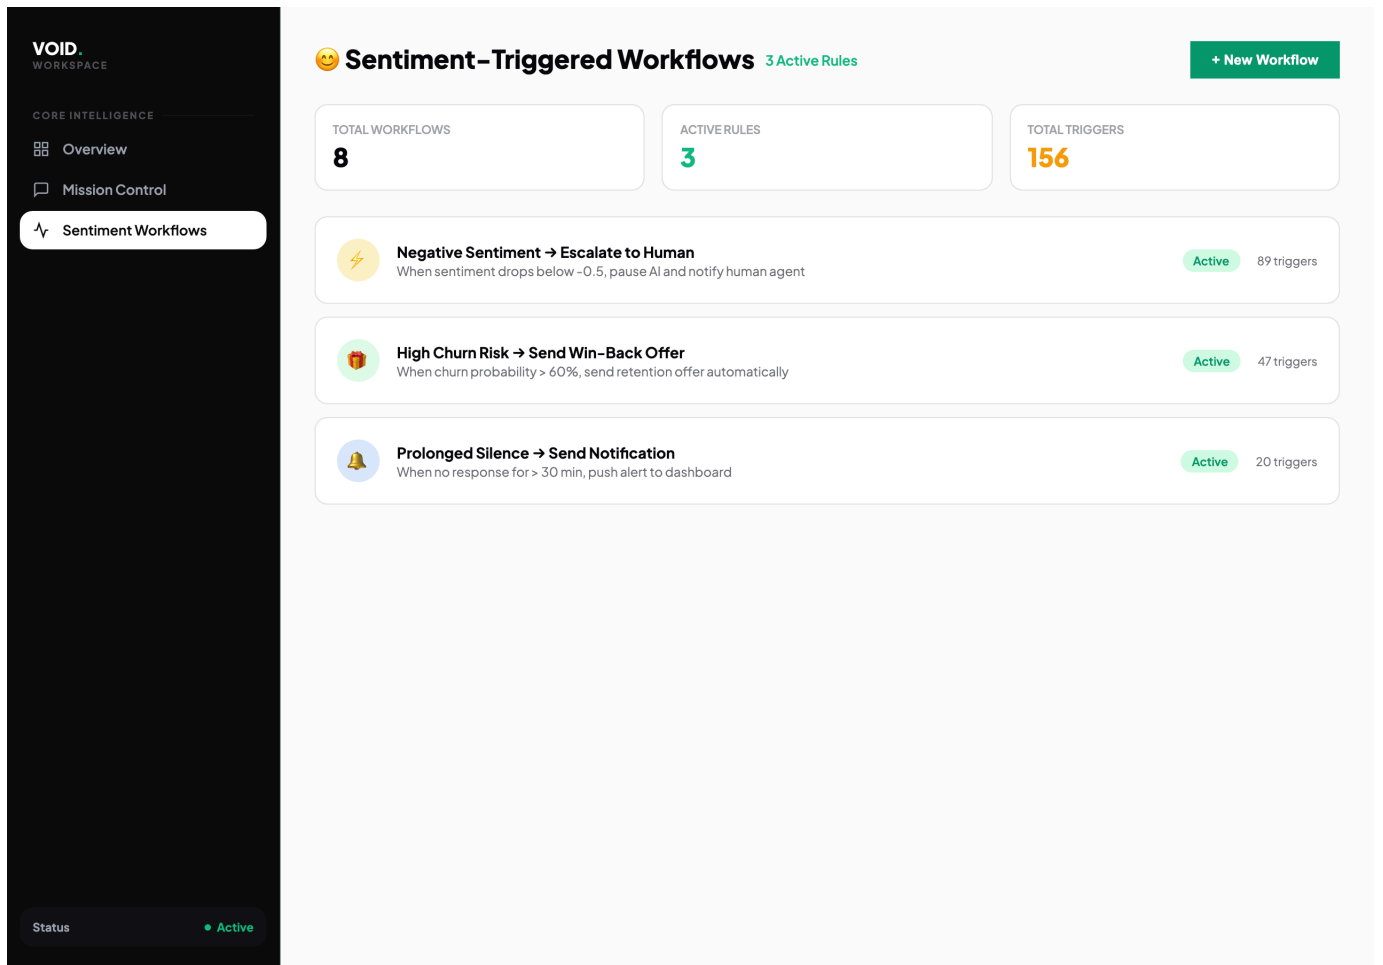

Predictive Lead Scoring v2.0

- **Deal Value Estimation:** AI predicts potential deal value alongside lead score
- **Multi-Factor Scoring:** Combines engagement, intent signals, and historical patterns
- **Dynamic Updates:** Scores update in real-time as new interactions occur
- **Pipeline Integration:** Scores feed directly into deal pipeline management

Automated Deal Pipeline Management

- **Stage Automation:** Automatically move deals through pipeline stages based on AI analysis
- **Deal Velocity Tracking:** Monitor how fast deals progress through each stage
- **Revenue Forecasting:** AI-powered revenue projections based on pipeline data
- **Win/Loss Analysis:** Track and analyze won and lost deals for pattern insights

Sentiment-Triggered Workflows

- **Real-Time Sentiment Analysis:** AI detects customer sentiment in every message
- **Proactive Retention:** Automatically trigger retention workflows when negative sentiment is detected
- **Escalation Rules:** Route frustrated customers to human agents instantly
- **Positive Reinforcement:** Trigger upsell workflows when sentiment is high

AI Conversation Summary

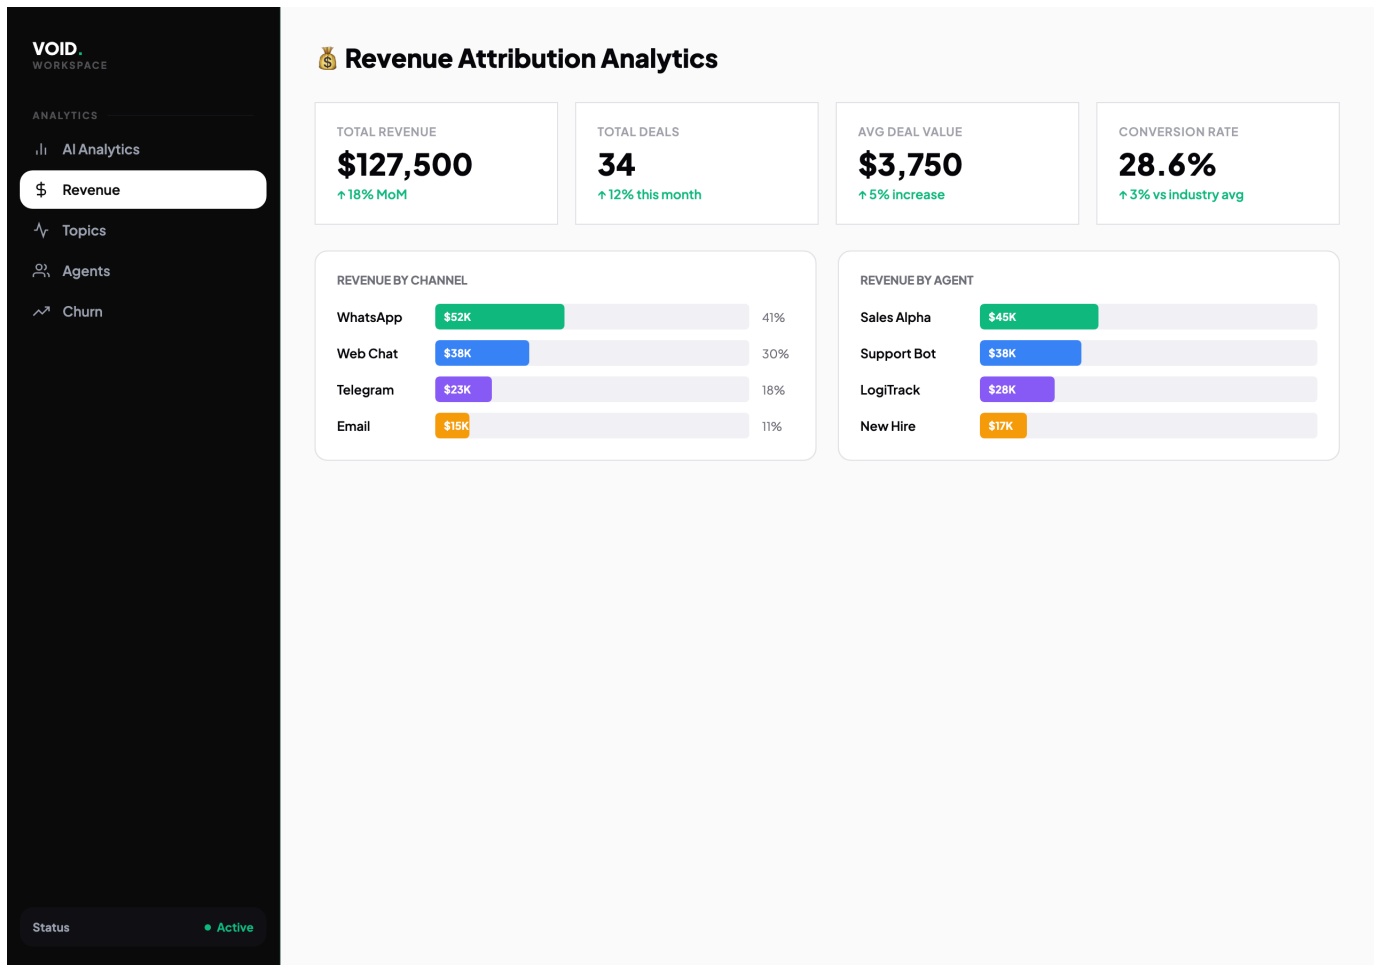

- **Automatic Summaries:** AI generates concise summaries of every conversation
- **Key Information Extraction:** Names, emails, decisions, and action items captured
- **Searchable Summaries:** Find conversations by content without reading full threads
- **Handoff Context:** Summaries ensure smooth transitions between AI and human agents

Smart Follow-Up Scheduler

- **AI-Powered Scheduling:** AI determines optimal follow-up timing based on conversation context
- **Automated Reminders:** Never miss a follow-up with intelligent scheduling
- **Channel-Aware:** Follow-ups are sent on the same channel the conversation occurred
- **Priority-Based:** Urgent leads get faster follow-ups automatically

Advanced Analytics Suite (New)

Revenue Attribution Analytics

- **Revenue Tracking:** Attribute revenue to specific agents, channels, and conversations
- **ROI Calculation:** Measure return on investment for each AI agent
- **Channel Performance:** Compare revenue generation across WhatsApp, Telegram, Web, and Email
- **Time-Based Analysis:** Revenue trends over daily, weekly, and monthly periods

🔍 Topic Clustering & Trend Detection

- **Automatic Topic Discovery:** AI clusters conversations by topic without manual tagging
- **Trend Detection:** Identify emerging topics and customer concerns in real-time
- **Volume Tracking:** Monitor topic volume changes over time
- **Emerging Issues:** Get alerted when new topics spike in frequency

📈 Agent Performance Analytics

- **Per-Agent Metrics:** Individual performance scores for each AI agent
- **Response Quality:** Track resolution rates, satisfaction scores, and efficiency
- **Comparative Analysis:** Compare agent performance across similar workloads
- **Improvement Recommendations:** AI suggests specific improvements per agent

📉 Churn Analytics

- **Churn Prediction:** AI identifies customers at risk of churning
- **Churn Reasons:** Automatically categorize why customers are leaving
- **Retention Metrics:** Track retention rates across channels and agents
- **Recovery Workflows:** Trigger automated win-back campaigns

✅ Conversation Quality Analytics

- **Quality Scoring:** Automated quality assessment for every conversation

- **Compliance Monitoring:** Ensure agents follow brand guidelines and policies
 - **Resolution Tracking:** Monitor first-contact resolution rates
 - **Customer Satisfaction:** Aggregate CSAT scores with trend analysis
-

Platform Enhancements (New)

14-Day Free Trial

- **Full Access:** Try all platform features during the trial period
- **No Credit Card Required:** Start immediately without payment information
- **Seamless Upgrade:** Convert to paid plan with one click after trial

Plan-Based Rate Limits & Usage Quotas

- **Tiered Limits:** Usage quotas aligned with subscription plans (Free, Starter, Pro, Enterprise)
- **Real-Time Monitoring:** Track usage against plan limits in the dashboard
- **Smart Alerts:** Get notified before hitting plan limits
- **Graceful Degradation:** Helpful messages when approaching or exceeding limits

Centralized Error Logging

- **Unified Logging:** All errors captured in one centralized logging system
- **Error Categorization:** Automatic categorization by severity and type
- **Stack Traces:** Full debugging information for technical issues
- **Alert Integration:** Configurable alerts for critical errors

Enhanced Invoicing

- **Payment Method Selection:** Two-step invoice flow — select payment method, then confirm
- **Mark as Paid:** Manual payment confirmation with payment method tracking
- **Invoice History:** Full invoice history with payment status
- **Revenue Integration:** Invoices feed into revenue attribution analytics

Admin Blog & News

- **Content Management:** Admin pages for managing blog posts and news articles
- **Public Publishing:** Blog content accessible to public visitors
- **SEO Optimized:** Structured data and meta tags for search engine visibility

Public Company Pages

- **Company Profiles:** Public-facing pages for partner companies
 - **Case Studies:** Showcase success stories and use cases
 - **Footer Navigation:** Accessible from the site footer for all visitors
-

How It Works

HOW IT WORKS

Live in three steps.

No engineers. No six-month rollout. Ship your first agent today.

01

Describe the job

Tell VOID what you need in plain language. No prompt engineering required.

02

Connect your stack

Plug in WhatsApp, Telegram, web, email and your CRM. Your agent learns privately.

03

Deploy & relax

Go live in minutes. Run 24/7 with full visibility from the console.

Step 1: Describe the Job

Takeover

⚡ AI is handling this conversation — Takeover to respond manually

Hi, I'm interested in your enterprise plan. Can you tell me more about pricing?

15:42

Hello John! I'd be happy to help you with our Enterprise plan. It's designed for large organizations and includes unlimited agents, dedicated LPU nodes, and priority support. The plan is \$299/month. Would you like me to walk you through the features?

15:42

Yes, what kind of integrations do you support?

15:43

We support WhatsApp Business, Telegram, Web Chat, Email (IMAP/SMTP), and you can connect your CRM via webhooks. Enterprise also gets API access and custom integrations. Would you like to book a demo to see it in action?

15:43

Type a message...

Active: 5Takeover: 1AI Rate: 92%

Real-Time AI Conversations

- **Instant Responses:** Sub-100ms response times powered by Groq LPU
- **Human Takeover:** Seamless handoff to human agents when needed
- **Multi-Channel:** Same agent works across WhatsApp, Telegram, Web, and Email
- **Context-Aware:** RAG-powered responses that stay on-brand and accurate
- **Multi-Language:** AI automatically detects and responds in the customer's language
- **Context Windowing:** Smart memory that preserves key context across long conversations

Target Industries

Industry	Use Case
E-Commerce (Shopify/DTC)	Complex order tracking and product recommendations on WhatsApp
SaaS (B2B)	Instant technical support and documentation retrieval
High-Ticket Sales	Initial lead qualification and appointment setting
Internal Knowledge	Employee-facing bots for HR and Policy lookup
Healthcare	Medical care, scheduling & triage support
Warehouse & Logistics	Inventory, stock & shipping inquiries
Grocery & Retail	Deliveries, refunds & support, product catalog browsing

Real Estate	Leasing, sales & property inquiries
Hotel & Concierge	Hospitality, bookings & guest services

Technology Stack

- **Inference Engine:** Powered by Groq LPU (Language Processing Unit) with sub-100ms response times
- **Neural Memory:** Retrieval-Augmented Generation (RAG) for accurate, context-aware responses
- **Integration Layer:** Custom-built webhooks for WhatsApp Business Cloud API and Telegram Bot API
- **Data Lifecycle:** Automated MongoDB TTL indexing for 30-day data purging
- **Multi-Language Engine:** Heuristic + LLM hybrid language detection with 30+ language support
- **A/B Testing Engine:** Deterministic traffic splitting with statistical significance testing
- **Context Windowing:** Smart conversation memory with importance scoring and LLM summarization

Competitive Advantage

Feature	Legacy Bots (Intercom/Zendesk)	VOID Neural Agency
Response Speed	2-5 Seconds (High Latency)	<100ms (Instant)
Human In Loop	Ticket Escalation (Slow)	Live Takeover (Instant)
Training	Manual Rule-Sets	Auto-Web Scraping/Doc Ingestion
UI/UX	Generic Dashboard	Premium "Neural Lab" Aesthetic
Data Privacy	Indefinite Storage	30-Day Auto-Purge Protocol
Multi-Language	Manual Setup	Auto-Detection (30+ Languages)
Optimization	Manual A/B Testing	AI-Powered A/B Testing with Statistical Significance
Memory	Limited Context	Smart Context Windowing with Summarization
CRM	Basic Contact Storage	Predictive Scoring, Journey Mapping, Deal Pipeline
Analytics	Basic Metrics	Natural Language Queries, Topic Clustering, Revenue Attribution

Pricing

- **Free Tier:** 50 messages/month - Perfect for testing (14-day free trial available)
- **Starter:** \$29/month - For small businesses
- **Pro:** \$99/month - For growing teams (includes WhatsApp Catalog)
- **Enterprise:** \$299/month - For large organizations (includes AI Intelligence Suite)

All plans include WhatsApp, Telegram, and web chat integration. Plan-based rate limits and usage quotas apply.

Getting Started

1. **Sign Up:** Create your account at void.ai (14-day free trial, no credit card required)
2. **Onboarding:** Complete the 3-step onboarding process
3. **Train:** Upload documents or connect web pages to build your knowledge base
4. **Deploy:** Connect your communication channels and go live
5. **Optimize:** Use A/B testing, analytics, and AI goals to continuously improve
6. **Scale:** Add more agents and explore the AI Intelligence Suite

Support & Documentation

- **Documentation:** Comprehensive guides and tutorials available in-app
 - **Support:** 24/7 support available through the dashboard
 - **Community:** Join our community of early adopters and share best practices
-
