Q

...

Hi, I'm looking at the Enterprise plan. Can you tell me more about the features?

Hey there! 🙌 Happy to walk you through our Enterprise plan. Here's what you get:

- Unlimited AI agents
- Dedicated Groq LPU nodes for sub-100ms responses
- Priority support & custom integrations
- Advanced analytics & webhook access

Want me to help you get started?

Sounds great! How do I set up a WhatsApp channel?

Super easy! Just head to your **Dashboard** → **Agent** → **Channels** and click "Connect WhatsApp." We'll walk you through the Business Cloud API setup — takes about 5 minutes.

Once connected, your agent starts receiving messages instantly. No coding needed. 🚀

Can I try it for free first?

Absolutely! We have a **free tier** with 50 messages/month — perfect for testing. No credit card required. You can deploy your first agent right now and upgrade whenever you're ready. 🍕

🛡️ Human takeover available

Security built in

We take data privacy seriously — here's what we do today.

Data isolation

Every account gets its own environment. Your data never mixes.

Encryption

Data encrypted at rest and in transit. We never train on your data.

Privacy-first

Your data never trains our models. Enterprise data isolation.

SOC 2 Certified

All infrastructure providers are SOC 2 Type 2 certified.

Forward

Hi VOID Team,

I'm reaching out from Acme Corp regarding a potential enterprise partnership. We've been following your platform's development and are impressed with the autonomous agent capabilities.

We have a team of 50+ support agents and are looking for an AI solution to handle tier-1 inquiries. Could we schedule a call to discuss:

Enterprise pricing and volume discounts

Custom integration with our Salesforce CRM

SLA guarantees for response times

Looking forward to hearing from you.

Best regards,

Sarah Chen

VP of Operations, Acme Corp

☆ AI SUMMARY

Enterprise partnership inquiry from Acme Corp (50+ agents). Interested in pricing, Salesforce integration, and SLA guarantees. High-intent lead — recommend priority follow-up.

AI Email Hub Components:

Sidebar

- **Compose Button:** Create new email
- **Folders:** Inbox, Sent, Drafts, Trash
- **Connected Account:** Shows connected email account

Email List Panel

- **Search:** Filter emails by subject, sender, or content
- **Email Rows:** Each showing:

- Subject line and timestamp
- Sender name and company
- Preview text
- Unread indicator

Email Detail Panel

- **Email Header:** Subject, sender info, timestamp
- **Reply/Forward Actions:** Quick action buttons
- **Email Body:** Full email content
- **AI Summary:** AI-generated summary with intent analysis

Features

- **Multi-Account Support:** Connect multiple email accounts
- **IMAP/SMTP Integration:** Standard email protocol support
- **Gmail OAuth:** One-click Gmail connection
- **AI Triage:** Automatic email categorization

Mission Control Flow

Mission Control Layout & Components

Mission Control Components:

Conversations Sidebar

- **Header:** Live status indicator and search

- **Filters:** All / AI / Takeover
- **Conversation List:** Each showing:
 - Contact name and company
- **Channel tags:** WhatsApp, Telegram, Web, Email
- **Status badges:** AI or TAKEOVER
- **Timestamp:** Last message time

Chat Area

- **Chat Header:** Contact info, channel, AI status
- **Takeover Button:** Switch from AI to human control
- **Message Thread:** Conversation history with:
 - User messages (left-aligned)
 - AI/Human responses (right-aligned)
 - Timestamps and channel info
- **Takeover Banner:** AI status notification
- **Input Area:** Message composition with send button

Stats Footer

- **Active:** Number of active conversations
- **Takeover:** Conversations under human control
- **AI Rate:** Percentage handled by AI

Key Features

- **Real-Time Monitoring:** Watch conversations live
- **Instant Takeover:** Take control of any conversation
- **Multi-Channel View:** See all channels in one place
- **AI Status Tracking:** Monitor AI vs human handling

Security & Trust

Security Architecture

5-Layer Security:

Layer 1: Authentication

- Clerk Auth integration
- JWT token validation
- Multi-factor authentication

Layer 2: Data Encryption

- AES-256 encryption at rest
- TLS 1.3 encryption in transit
- End-to-end data protection

Layer 3: Data Isolation

- Per-account environment isolation
- Sovereign training data
- No cross-account data leakage

Layer 4: Data Lifecycle

- 30-day TTL indexing
- Auto-purge protocol
- GDPR/CCPA compliance

Layer 5: Compliance

- SOC 2 Type 2 certified infrastructure
 - Regular security audits
 - Privacy-first data handling
-

Quick Reference Guide
